“Crescent Bronze is our #1 choice when recommending metallic paints.”

- Yanky Weiss

Rockland's Hardware & Paint

Project Details

The client wanted the dining room in this new construction to be a truly dynamic and luxurious space. Uprise Improvements, known for their elegant upscale projects, used sponge painting faux finishing techniques with Crescent Bronze metallic paints over a tinted base to bring the ceiling and wall panel accents to life.

They used sophisticated modern white trim to enhance the metallic effects. This project shows the power of faux finishing done by a professional. Thanks to our loyal paint supplier Rockland's Hardware & Paint, and the team of builders/applicators at Uprise. [For more Faux Finishing Techniques, please view our You-Tube Channel.](#)
