Project Details

The Bailiwick Venue is a premiere wedding and event venue located near Medford, Wisconsin. The venue is situated with beautiful vistas and tons of gorgeous landscaping. Ownership renovated the facility and wanted to add bold copper accents to exterior of the building.

“We Chose A Crescent Bronze Copper Because It Is Timeless, Uniquely Classy, And It Stands Out From The Moment Couples Or Groups Come To View The Venue.”

- Samantha Shotliff

The project required a water-based primer to be added to the existing exterior paneling, followed by a spray application of Crescent Bronze water-based metallic copper and finally a durable protective clear coat.

For information regarding the venue or utilizing this space, please reach out to our friends at The Bailiwick using the information provided on the left.
